SPRING VALLEY VILLAGE

October 21, 2019

Dear Resident:

As part of the Spring Valley Village Capital Improvement Program, Loeser Drive, Traweek Drive, Lone Star Drive, & West Tex Drive are scheduled for re-construction to replace aging infrastructure and keep Spring Valley Village sustainable and viable. This Project will require the installation and construction of .70 miles of new pavement, underground storm sewers, and new water and wastewater lines.

The Engineer for this Project is IDS Engineering Group. Since construction design has just started, construction is not estimated to begin until the second calendar quarter of 2020. Depending on the construction start date, this Project is estimated to be completed in Feb of 2021.

Although the City is currently in the pre-design phase, you will see paint markings, survey crews, and a geotechnical team on your street in the next couple of weeks. The paint marking and flags you may see are required to mark the underground utilities so the survey crews can identify and accurately locate the utilities on the design plans. It is anticipated that the survey and geotechnical crews will be able to complete their work in a few days.

In order to communicate with you quickly and effectively about the Project, you are strongly encouraged to sign up for alerts through the City website at <https://www.springvalleytx.com/list.aspx>.

1. Type your email address in the box and select **Sign In**.
 2. If you want to receive text messages enter your phone number and select **Save**.
- To subscribe or unsubscribe click and/or next to the lists to which you wish to subscribe/unsubscribe.

We look forward to providing you with updates as this Project progresses. Should you have any questions, please feel free to call City Hall at (713) 465-8308 or contact me by email to priley@springvalleytx.com.

Sincerely,

A handwritten signature in blue ink that reads 'Pat Riley'.
